

ITMD 565- Assignments 2

Name: Sanjyoti Patil

CWID: A20332642

User Interface:

- The application is video player where we have CSS3 and JQuery to create animation and for an improved user interface.

Implemented Operations:

- 1) Used JQuery Library.
- 2) When page loads all video displayed by thumbnail and with video titles.
- 3) User can click onto individual video to watch it.
- 4) User can see video controls like play, pause and theatre mode.
- 5) Video description will be shown after 25% of video completion.
- 6) In theatre mode, when video will be finished we can see next video is playing automatically.
- 7) Video data stored in local storage and used accordingly. This will implement the feature like watched video displayed at the end of the list.
- 8) User can pause the video, and attempt to re-seek to its saved progress if the page is refreshed or otherwise loaded again.
